Theoretical Lineage → Design Mechanism

The cited literatures inform distinct mechanisms; none determines the five provisional percentages.

EFFECTUATION Sarasvathy (2001) Control under uncertainty / Affordable loss	→ **Define exposure and decision bounds** →	**01 Decision** Canvas operational requirement
REAL OPTIONS McGrath (1999) Staged investment / Preserve switch options	→ **Reconfigure commitment before demanding proof** →	**03 Exposure** Canvas operational requirement
EXPERIMENTATION Camuffo et al. (2020) Testable hypotheses / Better evidence precision	→ **Set direct, relevant evidence requirements** →	**02/04 Evidence** Canvas operational requirement
ESCALATION Staw (1976) Sunk-cost persistence / Negative-feedback risk	→ **Pre-specify observable exit conditions** →	**05 Exit trigger** Canvas operational requirement
DESIGN SCIENCE Hevner et al. (2004) Artefact form and function / Explicit evaluation	→ **Construct, benchmark and falsify tool** →	**Evaluation programme** Canvas operational requirement

Design conjecture: evidence burden varies with reversible exposure, testing cost, and feasible exit options.
